

An essential feature of the claims of this case, analogous to the issued claims of U.S. Patent No. 5,728,541, is the ability of the non-disaggregated particles to grow in a way that disaggregated cells cannot in the context of the present invention.

It is believed that the Terminal Disclaimer filed herewith resolves any double-patenting rejection which might now or in the future be made with respect to the issued and/or co-pending applications identified in the Terminal Disclaimer.

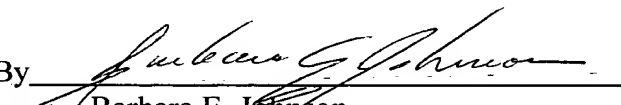

CONCLUSION

It is believed that the above-identified patent application is in condition for immediate allowance. If any issue remains for resolution, the undersigned would very much appreciate a telephone call at the number listed below.

Respectfully submitted,

WEBB ZIESENHEIM LOGSDON
ORKIN & HANSON, P.C.
